KY 32 - Lawrence County
Harriet Branch, Whetstone Branch, Greenbriar
Creek, Smoky Valley Fork, Burgess Branch
Lawrence County, Kentucky

Dear Mr. Rigney:

The Kentucky Division of Water has received the Application for Water Quality Certification submitted for the above-referenced project. The following information is needed to complete our review:

- Please provide the name of the United States Army Corps of Engineers (USACE) project manager reviewing this activity;
- Please provide separate latitude / longitude values and watershed values for each impact. For example, at site 13 (Right Sta. 100+50 to Left Sta. 110+00), 622' of perennial stream, 716' of intermittent stream, and an additional 36' of intermittent stream are listed. Only one watershed value (858 acres) is cited, and only one latitude / longitude value is cited.
- For the following locations, please re-examine the watershed size. The size does not appear to match the latitude / longitude value cited:
 - Right Sta. 20+00 to Left Sta. 27+20;
 - Sta. 29+00;
 - Right Sta. 100+50 to Left Sta. 110+00;
 - Sta. 116+50.83;
- The latitude / longitude for Int 10 (STA 135+50 to 145+50) appears to be on a hill side adjacent to Smoky Valley Fork. Please verify that this latitude / longitude is accurate.
- The summary of impacts on page 6 states that Intermittent 8 contains 72 feet of "estimated amount of resource in review area". Summary of Impacts on page 12 notes the impact as 36 feet. Please explain this difference.

Mr. Ronald Rigney, II
Page Two

- The High Gradient Stream Data Sheets will be assessed during a site visit. Please contact our office in order to schedule a site visit.
- A final mitigation determination will be made following the site visit, in which High Gradient Stream Data Sheets will be assessed.

All future correspondence on this project must reference **AI No. 106290**. If you should have any questions regarding the contents of this letter, please contact Jesse Robinson by calling (502) 564-3410.

Sincerely,
